

## HOW TO SHORTEN YOUR WEB ADDRESS?

Your unique NMplus/ACFS web address is kind of long. This is required for our software to work properly. Some members would rather use a shorter web address (URL) and that is possible. Although in reality, you're not "shortening" your web address. You're really purchasing your own web address... one you choose... and then have it forwarded to your Unique NMplus Web Address. **This is fairly Simple and Completely Optional.**

Once you purchase a shorter web address, you would simply use that web address in all your Ads and on your Postcards. Once a prospect typed in your new "shorter" web address... they would be automatically re-directed to your Unique NMplus/ACFS Web Address.

Here's how to get a shorter web address and set it up.

- Go to [www.networxdomains.com](http://www.networxdomains.com). You can purchase your own domain name for under \$10 per Year. You can also use GoDaddy.com
- Think of a good domain name. You might have to think of several, as many names have already been taken.
- Purchase the domain name. When asked if you would like a "re-direct" of the domain name... enter your **unique NMplus/ACFS web address.**

It will read something like

<http://www.nmplus.com/mbr/uid/xxxx> with the "xxxx" being your ACFS ID#. (example cfs100 or cfs100mt)

- Complete the order and direct prospects to your new Domain Web Address. This would go in your offline ads, postcards and online ads.
